

# Rodney Edwin-King

AWS Cloud Engineer | Terraform | CloudFormation | Python | CI/CD | AWS Operations

Greenwood, IN | (773) 355-0240 | edwinkingrodney@gmail.com | linkedin.com/in/rodney-edwin-king-84209022a/

## Professional Summary

AWS cloud engineer with 8+ years of experience supporting enterprise cloud infrastructure, platform operations, automation, CI/CD, monitoring, security, cost optimization, and production support. Experience spans 32 AWS accounts across development, test, and production environments, 20+ CI/CD pipelines, and cloud delivery across 5 teams. Strong background with AWS services including EC2, S3, RDS/Aurora, DynamoDB, Lambda, IAM, VPC, CloudWatch, CloudTrail, AWS Config, Security Hub, Systems Manager, CloudFormation StackSets, Terraform, Python, Bash, PowerShell, and Azure DevOps. Known for improving deployment consistency, strengthening cloud security posture, supporting compliance-aligned operations, and resolving production cloud issues with urgency and clear documentation.

## Core Skills

- AWS Cloud Infrastructure: EC2, S3, RDS, Aurora, DynamoDB, Lambda, VPC, IAM, ALB/ELB, CloudWatch, CloudTrail, AWS Config, Systems Manager, Security Hub, AWS Backup, AWS Organizations, Control Tower
- Infrastructure as Code: Terraform, CloudFormation, StackSets, AWS CDK, Ansible exposure, reusable deployment patterns, version-controlled infrastructure
- Automation and DevOps: Python, Bash, PowerShell, AWS CLI, YAML, JSON, Azure DevOps, Jenkins familiarity, Git workflows, CI/CD pipeline support
- Security and Compliance: IAM design, least privilege access, secrets/key rotation, audit logging, encryption, vulnerability remediation, NIST, HIPAA, SOC 2, regulated-environment support
- Operations and Reliability: production troubleshooting, monitoring, alerting, incident response, root cause analysis, patching, backup/recovery, right-sizing, cost visibility, FinOps support
- Cloud-Native Platforms: Docker/Kubernetes concepts, EKS exposure, serverless workflows, API-backed workloads, database-backed application support

## Professional Experience

### Management Science Associates | Cloud Administrator, AWS Platform Automation

Remote | August 2023 - Present

- Support secure AWS platform operations across 32 development, test, and production accounts, improving governance, reliability, and operational consistency for enterprise application teams.
- Build and maintain 20+ CI/CD pipelines across 5 teams, supporting automated AWS cloud delivery, Terraform-driven deployment practices, rollback planning, and release troubleshooting.
- Design reusable AWS infrastructure patterns using CloudFormation StackSets, AWS CDK, Terraform-related workflows, IAM, VPC, EC2, S3, Lambda, RDS, DynamoDB, CloudWatch, CloudTrail, and AWS Config.
- Improve cloud security posture through IAM policy review, least-privilege access support, access key cycling, vulnerability remediation, logging controls, and audit-ready operational documentation.
- Monitor production cloud environments using CloudWatch, CloudTrail, AWS Config, Security Hub, deployment logs, IAM reviews, and service health signals to identify and resolve platform issues.
- Partner with application, DevOps, infrastructure, security, and business stakeholders to translate cloud requirements into secure, repeatable, cost-aware infrastructure patterns.
- Support cloud cost visibility and optimization through tagging, CloudHealth/AWS billing analysis, quarterly reviews, resource utilization review, and right-sizing recommendations.
- Maintain operational runbooks and compliance-aligned documentation for AWS governance, monitoring, vulnerability remediation, backup/recovery, and post-incident improvements.

### Walmart | Cloud Engineer

Remote | March 2022 - August 2023

- Supported AWS and Azure cloud environments with infrastructure provisioning, automation, monitoring, CI/CD support, and production issue resolution.
- Built reusable Python and Bash automation for AWS infrastructure provisioning, operational checks, deployment validation, and support workflows.
- Supported CI/CD and release workflows using Azure DevOps, Jenkins concepts, Git workflows, scripting, and cloud deployment troubleshooting.
- Implemented and supported centralized logging and monitoring using CloudWatch and Splunk to improve visibility, alerting, incident response, and root cause analysis.
- Worked with security and compliance teams to support cloud control alignment, vulnerability remediation, IAM review, logging, and compliance documentation.

### Utility Data Contractors | Cloud Engineer

Remote | December 2017 - March 2022

- Supported AWS infrastructure involving EC2, S3, RDS, Aurora, DynamoDB, VPC networking, IAM, monitoring, backup, and operational maintenance.
- Built and maintained Terraform and CloudFormation deployment patterns across development, staging, and production environments.
- Supported production-ready AWS VPC environments with public/private subnet design, route tables, NAT gateways, load balancing, and hybrid connectivity considerations.

- Implemented S3 versioning, lifecycle policies, AWS Backup practices, operational maintenance, and disaster recovery support to improve resilience.
- Troubleshoot deployment, access, networking, database, and infrastructure issues while maintaining documentation and repeatable support procedures.

### **Certifications**

- AWS Certified Solutions Architect - Associate | Validation: WNGJFFVC7EB4QH97 | Issued May 10, 2025 | Expires May 10, 2028
- AWS Certified DevOps Engineer - Professional | Validation: 2LVZ8B9CWBRQ1RSF | Issued August 25, 2023 | Expires August 25, 2026

### **Education**

- M.S. in Geographic Information Science | Unity Environmental University | 2021 | GPA: 3.97
- B.S. in General Science | University of Sierra Leone | 2015
